

LPG ENERGY FOR EUROPE'S REGIONS TODAY AND TOMORROW

AVAILABLE NOW

LPG supply is increasing every year and it can be sourced from many different regions, including Europe.

CLEAN ENERGY

As a mix of propane and butane gas, LPG helps improve air quality and emits fewer greenhouse gases than many alternatives.

PORTABLE

LPG needs no pipeline so it can be used in urban, rural and remote areas.

16 MILLION

Over 7 million households (16.8 million people) use LPG for heating in EU28.

15 MILLION

Today, more than 6.2 million households (15 million people) cook with LPG in EU28.

LPG
EXCEPTIONAL ENERGY

RENEWABLE-FRIENDLY

LPG is the perfect partner for renewable energy sources, as it can be used in gas heat pumps or thermo-solar installations. Moreover, bioLPG is being produced in small but growing quantities in Europe.

WARM

Over 7 million households are kept warm by using LPG for heating.

VERSATILE

LPG can fuel a wide range of outdoor appliances. LPG gardening equipment is more durable, economical, and will not pollute the soil contrary to liquid fuels.

ESSENTIAL

15 million people in the EU28 use LPG to cook.

CLEAN

LPG is good for the environment: it produces near-zero PM and low NOx.

EFFICIENT

LPG can power integrated micro-CHP systems that provide simultaneous production of heat and electricity.

MOBILE

Autogas is the most widely used alternative fuel powering 7.8 million vehicles in the EU served by over 31.000 refueling stations.

PRACTICAL

LPG barbecues offer a range of benefits including controllable heat, time savings and environmental benefits.

EVERYWHERE

With LPG, no need to be connected to the natural gas pipeline for using gas. Storing LPG is easy and safe, and the storage tank can be conveniently installed below ground.

LPG - POWERING YOUR LIFE
